

2.5 INTERNAL PROCUREMENT RULES

The Employer, in conjunction with the Occupational Health and Safety Officer (OHSO):

- Checks the CE-marked PPE sent by the supplier and the mandatory documentation;
- Checks that the instructions are in a language that the worker understands;
- Establishes company procedures for giving, using, storing, inspecting and cleaning PPE, and for maintaining, repairing and replacing it in accordance with any instructions from the manufacturer, and procedures for returning and storing it after use;
- Assigns each item of PPE for use by a specific individual and, when circumstances require an item of PPE to be used by several people, takes appropriate measures so that this does not cause any health or hygiene problems for the various users;
- Checks that PPE is used correctly in accordance with procedures and instructions provided;
- Updates the PPE selected when the "residual" risks in the workplace change.
